Mr. Herndon is the chief hydrogeologist at the Orange County Water District, the agency responsible for managing the 350-square-mile Orange County groundwater basin in southern California. Mr. Herndon directs the activities of OCWD's Hydrogeology Department, including numerical groundwater flow modeling, performance evaluation and improvement of two seawater intrusion barriers, basin-wide and local water level and water quality investigations, and the operation of a comprehensive water resources data management system. He is a former director of the Groundwater Resources Association of California and serves on the Alamos Seawater Barrier Management Committee and MCAS El Toro Restoration Advisory Board. Current activities include contaminant plume investigation and remediation, seawater intrusion investigation, and recharge alternatives evaluation. He holds a B.A. degree in Geology from The Colorado College, a M.S. degree in Hydrology and Water Resources from the University of Arizona, and is a California professional geologist and certified hydrogeologist.
